École polytechnique fédérale de Lausanne, Switzerland

Dr. Masaya Notomi / Dr. William J. Munro  
NTT Basic Research Laboratories, Japan

The NTT Basic Research Laboratories School (NTT-BRL School) aims at providing an opportunity for young researchers to learn recent progress and future directions in the fields of "Nano and Optics". Prestigious professors and researchers are invited as our lecturers. Every student of the BRL school also has a poster presentation on their research topics to exchange knowledge and experience.

## General Informations for Participants

**Eligibility:** Master's course or Ph.D students from all over the world. Note that all seminars are given in English and all participants are required to introduce their current research at the poster session. Poster session will be held in conjunction with ISNTT (International symposium on Nanoscale Transport and Technology) 2015.

**How to Apply:** Apply ONLINE. Send us your general information, the title, and the abstract for your poster, length limited to 300 words explaining about your research.

**Inquiry:**

Email:  
brlschool2015@lab.ntt.co.jp

Website:  
<http://www.brl.ntt.co.jp/event/brlschool2015/>

**Expenses:** NTT will cover your round-trip airfare and cost for accommodation during school period.
