Support language learning with automatic AI scoring

Abstract
We have been developing automated scoring technology to support the teaching of writing and speaking in English/Japanese language education. Everyone can experience automated grading technology through a demonstration of an English/Japanese-learning website.

Features
- Our AI can automatically grade English writing/speaking tests and Japanese speaking ability.
- The error of the user answer is indicated, and the better answer is presented.

Application Scenarios
- English composition and speaking practice for students.
- English teacher’s correction work.

Roadmaps
- Continual technical improvements that will contribute to the improvement of DOCOMO’s language education application services (English 4 skills).

Exhibitors
NTT DOCOMO, INC.
